

THE BIPOLAR TECHNIQUE LANDS IN MILAN

Thanks to the excellent collaboration between MediNext and Euros, the team at the Niguarda Spinal Surgery Centre got to know and encountered Professor Miladi, one of the leading experts in spinal surgery at the Necker Hospital in Paris, who was asked for a consultation for a complex surgery on 9 July 2022.

Specialist Pietro Giorgi and Professor Lofti Miladi completed a complex operation to correct a severe neurological scoliosis using the innovative procedure developed by Miladi himself and called the 'bipolar technique'.

This technique, with small incisions at the end of the deformity, allows the scoliosis to be corrected with reduced risks and recovery time.
